Permabond adhesives and sealants are used to lock bolts and form gaskets in many types of valves. A few of those are listed on these pages. If you don’t see your valve application here please contact us.

**Application: Globe Valve Threadlocking**

Permabond HM129 is used on the hand wheel stem to permanently lock bolts. Permabond MM115 & A1042 are used to lock used to lock Stuffing Box Bolts and Bonnet Bolts.

**Benefits of Permabond anaerobic threadlockers:**
- Lock bolts against vibration loosening
- Single component - No Mix Step Required
- Fast Fixture Speed - Efficient Process
- Ambient Cure - Energy Efficient
- Good Shelf Life - No refrigeration or freezing needed
- Prevents corrosion - eases repair

Adhesive used: Permabond HM129 and MM115

**Application: Bonding and Sealing Valves in Potable Water Contact**

Permabond products are used worldwide in potable water applications. Permabond has both WRAS and NSF/ANSI 61 Certifications. Contact Permabond for a product recommendation.
## Valve Applications

### Gate Valve Sealing

**Application:** Form in Place Gaskets on Bonnet

Permabond LH197 is a flexible form-in-place gasket that seals the bonnet and forms the mating gaskets on this gate valve.

**Benefits of Permabond Gasketmakers®:**
- Rapid cure speeds and good seal integrity improve production rates
- Remains pliable & is inherently corrosion resistant - easy to remove with normal hand tools
- Eliminates stocking various gasket sizes

**Adhesive used:** Permabond LH197

Regardless of the flange size or shape, Permabond Gasketmakers form a complete seal and are easily removed.

### Pressure Relief Valve Sealing

Permabond products seal plastic as well as metal valves of various sizes and shapes against both liquid and gas pressure.

**Plastic to Plastic**

**Plastic to Metal**

**Metal to Metal**

**All sealed with Permabond**
